BULLETIN No. 2

February 12, 1924

Mount Arbor Nurseries

E. S. WELCH, President

Shenandoah, Iowa

We offer one of the largest and most complete lines of General Nursery stock in the United States. Everything offered is young, thrifty, well-grown stock and graded to the highest standard. : : : : : :

FOR TERMS AND CONDITIONS REFER TO FALL 1923 TRADE LIST

STORAGE—Our modern Storage Buildings are especially designed for handling Nursery Stock in the best possible manner, enabling us to get the stock to our customers in prime condition. You should consider this in buying.

SEND US YOUR LIST OF WANTS. We can often quote lower than our published rates.

HEIGHT AND CALIPER—Height given of fruit trees is approximate and represents the average height of most varieties. Slow growing kinds will fall short of height specified, as it is intended that the caliper shall govern.

ROOT GRAFTS

Our piece root grafts are made with a six inch scion and three and one-half inch root, the same style that we make largely for our own planting. For whole root grafts we use the entire seedling, either a straight or branched root as the customer may select.

ANY STYLE OF GRAFT MADE TO ORDER

Prices quoted are for 100 and multiples of 100 of a variety.

	Per 1000
APPLE and CRAB, Piece Root, 1000 to 5000-----	\$17 00

Whole Root, No. 1-----	30 00

List of varieties sent on application.

All grafts boxed free. Samples sent on application.

FRUIT TREE STOCKS—American Grown

We have a good supply of Apple Seedlings, which have made up strong, were grown on new land, thoroughly sprayed throughout the growing season, are vigorous and healthy, and are free from insects and diseases; they were not dug until in November when well ripened. We guarantee them to give satisfaction.

We are frequently able to make car lot shipments to central points for distribution.

FRENCH GROWN—Imported

We import our stocks direct from the best French Growers of Fruit Tree Stocks.

Upon arrival of our import shipments, which come in car load lots, all stock is carefully examined by a Government Inspector and only clean healthy stock allowed to pass. All stock is carefully re-graded, hence customers can depend on getting stock of best quality without the risk of importing direct, which is an important item to consider in buying.

DECIDUOUS TREES

Our shade and ornamental trees are first-class, well-shaped, young and vigorous nursery grown trees, with good roots. They have been grown from seedlings, transplanted in nursery row especially for this purpose.

All calipers taken six inches above the collar.

STAINLESS STEEL

Stainless steel is a family of alloys which contain a minimum of 10.5% chromium. The chromium forms a thin, adherent, protective film of chromium oxide on the surface of the metal.

This film is self-repairing. If it is scratched or damaged, the chromium in the underlying metal reacts with the oxygen in the air to form a new film.

Stainless steel is resistant to corrosion by acids, alkalis, and salts. It is also resistant to oxidation at high temperatures. This makes it ideal for use in a wide variety of environments.

Stainless steel is also strong and durable. It has a high tensile strength and is resistant to wear and tear. This makes it ideal for use in structural applications.

Stainless steel is also easy to clean and maintain. It does not rust or stain, and it can be polished to a mirror finish. This makes it ideal for use in food processing and medical applications.

Stainless steel is a versatile material that can be used in a wide variety of applications. It is a good choice for anyone who needs a material that is strong, durable, and resistant to corrosion.

Stainless steel is also a good choice for anyone who needs a material that is easy to clean and maintain. It is a good choice for anyone who needs a material that is resistant to oxidation at high temperatures.

Stainless steel is a good choice for anyone who needs a material that is strong and durable. It is a good choice for anyone who needs a material that is resistant to wear and tear.

Stainless steel is a good choice for anyone who needs a material that is easy to clean and maintain. It is a good choice for anyone who needs a material that is resistant to staining.
